The Bureau of the Census Current Population Survey estimates that Oklahoma had a population of 3,505,000 in 2005 and that 647,000 were uninsured, a rate of 18.4% of the total population. In the above array – the BOC sum for small area estimates was only 607,000. The average of all three models appears to be very similar to CPS 2005 estimates (647,000 compared to 637,000).

Population (POP) estimates for 2005 are per the Bureau of the Census; OU Estimates are a locally developed algorithm based upon economic and demographic variables; BOC estimates are an experimental program of the Bureau of the Census; and OHCA estimates were provided by a HRSA funded grant with work performed by SHADAC at the University of Minnesota.
